U. S. RECORD OF PERFORMANCE BREEDERS

PARTICIPATING IN

THE NATIONAL POULTRY IMPROVEMENT PLAN

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Poultry Improvement Plan. Additional information regarding these breeders may be obtained by writing to them or to the R.O.P. supervisors in their respective States. This list is revised annually.

Foreword

The breeders listed in this publication are participating in the U. S. Record of Performance breeding stage of the National Poultry Improvement Plan, according to reports submitted by the State R.O.P. supervisors. The list of breeders on pages 3 to 12 also includes the number of candidates entered and the estimated number of females in single-male U.S.R.O.P. matings. These data provide a basis for estimating the volume of U.S.R.O.P. products that will be available on each of these farms. The official pullorum class of each flock also is shown.

Number of flocks, candidates, and females in U. S. Record of Performance matings by breeds, 1943-44 trapnest record year
